

Wiring Diagram

Improper or faulty wiring can result in serious hazards, including electrical fires, equipment damage, and potential injury. Examples of issues caused by bad wiring include overheating, short circuits, and electrical shocks, which may harm people, pets, or property. It is crucial to follow proper installation procedures.

We recommend that all outputs are fused at the battery!

Next Level Lighting LLC is **not liable** for any damages, injuries, or malfunctions resulting from faulty or improper wiring.
